Cleaning Statement

Date of issue: Feb 27, 2024

To whom it may concern:

We, the manufacturer, declare that our flange products mentioned below can be sterilized in the microwave steam bags, boiling water or autoclave 121 degrees Celsius for 15 minutes.

Product SKU (Model Number): MP012C-Fxx, MP012-Fxx, S012W-Fxx, S012W-B, M012-B, M012-Fxx, A012-Fxx, A012-B; xx being the size of the flanges. Packs of multiple units are not listed but their nomenclature follows the same prefix.

Material: Polypropylene

We have done autoclave study on our flanges/shields as the report below.

Reference: report #. TWNC00596197

URL: <http://www.maymom.com/en/reports/TWNC00596197%20autoclave.pdf>

The products mentioned above use the same material - polypropylene so they can fall into the same category as what is on the report. Be sure NOT to set the autoclave temperature/pressure above what is indicated in the report. Use 121 degrees Celsius, 14.2 psi, 15 min for the sterilization process.
